

STRIPPER II NON-AMMONIATED STRIPPER

DESCRIPTION

SCOT'S TUFF Stripper II Non-Ammoniated Stripper contains an ammonia-like agent to dissolve wax and synthetic finishes without the ammonia odor making it ideal for areas where ammonia is objectionable, such as nursing homes and food areas. To aid in the suspension and to prevent the re-depositing of the finish and soil, **Stripper II Non-Ammoniated Stripper** contains detergents and alkaline builders. This product is biodegradable.

APPLICATION AND USES

Use **Stripper II Non-Ammoniated Stripper** in areas where strong odors are objectionable. **Stripper II Non-Ammoniated Stripper** quickly dissolves carnauba wax finishes, polymer finishes, and metal interlock finishes. Use in auto scrubbers or apply with a mop. Do not use on wood floors.

DIRECTIONS FOR USE

Apply solution liberally to floor. Strip small areas at a time (size depends on manpower and equipment). Do not allow stripping solution to dry on the floor before picking it up. Allow a few minutes contact time with floor, and then scrub thoroughly with stripping pad or brush. Remove the dissolved finish with a wet vac, auto scrubber pickup, or mop and bucket. Then rinse floor and allow to dry thoroughly before applying new finish. Check for puddles remaining along walls or corners.

FEATURES AND BENEFITS

- Heavy-duty alkali formula
- Pleasant lemon fragrance
- Concentrated, economical formula
- Biodegradable

TECHNICAL DATA

Appearance..... Clear liquid
 pH..... 13.3
 Odor..... Lemon scented
 Stability..... Freeze/thaw stable, heat 140°F

| ITEM # | PACKAGED | DILUTION RATIOS | COVERAGE RATE |
|---------|-----------------------|---------------------|--|
| 254S001 | 1 Gallon Round 4/case | Normal buildup 1:10 | 800 – 1000 sq. ft./gallon |
| 254S005 | 5 Gallon Pail each | Heavy buildup 1:5 | (depending on coats of finish to be removed) |
